# Add-on

# Installation Guide

# Installation

First step to is to download solution from uds.systems webpage. After you download solution to your computer you should import .zip file to your Dynamics 365. Navigate to **Settings** (2.)> **Solutions**(3.)

On Solutions page click on **Import** button.

After you clicked on **Import** button on Solutions page pop-up window **Select Solution** Package will appear.

On pop-up window you should select **.zip** file that was downloaded in previous step and click **Next** button.

The next pop-up window will show the Name / Publisher / Package Type of the solution you are installing. This screen should show Name of our add-on from Publisher UDS.

Verify **Solution Information**(1.) and click on **Next**(2.) button.

Make sure that **Enable any SDK message processing steps are included into solution**(1.) checkbox is selected and click on **Import**(2.) button.

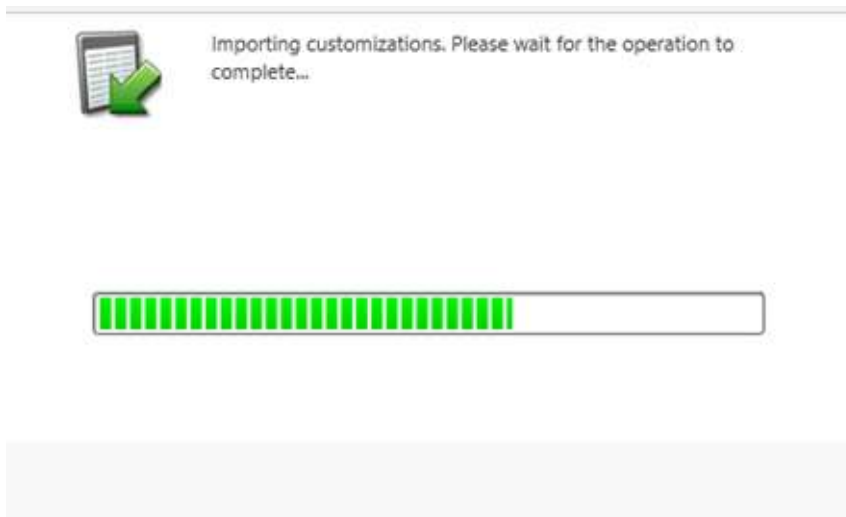

After you clicked on **Import** button, you will see the progress bar of the installation.

After finish of the uploading you will see the pop-up with yellow bar on the top (1.). It means that installation was completed successfully. Click on **Close**(2.) button.

**Importing Solution** ⓘ Help

ⓘ The import of solution: CRM Online Storage Analyzer completed successfully.
